- RST
- TF card slot
- HDMI Output
- USB Port
- Headphone jack (3.5mm)
- 12V power

\*HDMI output port is only available for HR-133S, HR-106 does not have this port.

Mounting brackets

HDMI cable

12V DC adapter

ACC power cable

Cigarette lighter power cable

Product connection method (\*choose one)

1. Car cigarette lighter 12V connection

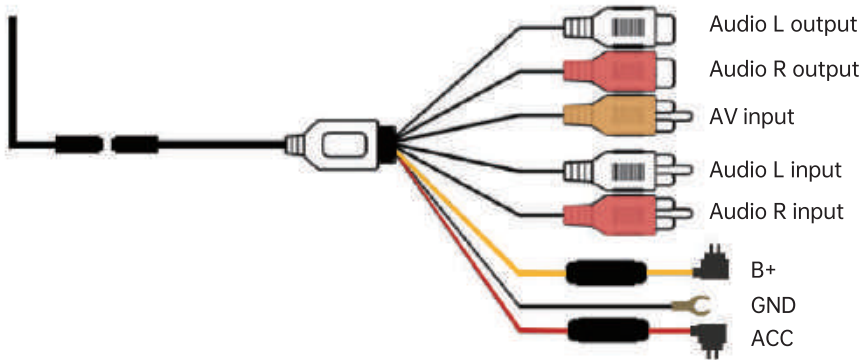

2. Car fuse box ACC power connection

3. DC adapter to connect to electricity (Use at home)

## Fuse box ACC power steps

ACC	<p>Use a multimeter to measure the hole position above 10A of the fuse box. When the engine is turned on, it lights up, and when the car is turned off, the hole position where it goes out can be determined to be ACC. Insert the red ACC wire connector.</p>
B+	<p>When the engine is off, use a multimeter to measure the fuse box. Insert the yellow B+ wire connector into the hole above 10A. There are lighted holes.</p>
GND	<p>Put the black GND wire on the iron near the fuse box.</p>

## Troubleshooting

### 1: There is no sound when playing on the headrest monitor?

A: Click the setting button in the bottom menu, click switch of FM . In addition, please confirm whether the Bluetooth headset is connected, if connected, close the connection or turn off the Bluetooth function.

---

### 2: It stays on the device starting interface and cannot enter the system.

A: Press and hold the home button at the bottom  for 5 seconds and then release it, it will enter the setting interface, click to restore factory settings, and then restart. ( If you cannot perform the above operations, please contact the seller to send a system upgrade package to upgrade )

**Note: This is caused by downloading and installing an incompatible APP, changing the monitor boot procedure, if you want the problem to no longer occur, please do not download and install the APP that caused the boot failure problem.**

---

### 3: Google Play Store can't find the APP I want.

A: please search and download the APP you want in **APKPure** APP.
